DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Sameer Gokhale (Registration No. 62,618) on April 2, 2009.

The application has been amended as follows:

(A) In the **claims**:

- a) In claim 1, line 9, after "this transfer element being" deleted [configured to be].
- b) In claim 17, line 7, after "the transfer element being" deleted [configured to be].
- c) In claim 27, line 7, after "the transfer element being" deleted [configured to be].

REASONS FOR ALLOWANCE

- 3. Claims 1 – 4, 6, 8 – 13, and 17 – 28 are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest, either singularly or in combination, at least an electronic device comprising: an active element comprising at least one of a photon or radiation detector, a photon or radiation emission device, and a MEMS; a transfer element comprising a first face and a second face and being assembled to the second face of the active element through its first face, and having electrical connections on its second face, this transfer element being assembled on a surface of another circuit on the side of its second face such that the second face of the transfer element is parallel to the surface of the another circuit; and at least one wire connection between the electrical connections of the first face of the active element and the second face of the transfer element. Katoh et al. (U. S. Pat. No. 4,743,868) teaches an active element, a transfer element comprising a first face and a second face and being assembled to the second face of the active element through its first face, and having electrical connections on its second face, and at least one wire connection between the electrical connections of the first face of the active element and the second face of the transfer element. However, Katoh et al. does not teach an active element comprising at least one of a photon or radiation detector, a photon or radiation emission device, and a MEMS and the transfer element being assembled on a surface of another circuit on the side of its second face such that the second face of the transfer element is parallel to the surface of the another circuit as set forth in claims 1, 17 and 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRIS C. CHU whose telephone number is (571)272-1724. The examiner can normally be reached on 11:30 - 8:00.
